READ THE FOLLOWING CAREFULLY

This is a list of the plants we handle, but they all come from different localities and there are times we do not have some of them for months. If you specify definitely the varieties you want, you will have to give us more time to ship your order. We have many of these on hand for immediate shipment, but we do not get enough of some of the varieties to put out a list and say we can give you immediate shipment as by the time your order comes in we may be sold out on that particular variety. Therefore, we can only accept your order for assortments (UNLESS YOU GIVE US THE TIME TO GET THE VARIETIES TOGETHER). If you order by name we will send what we have on hand at the time your order is received and send the balance as it arrives from the collectors. We sell all plants listed at 6 for \$5.00 or 13 for \$10.00 they will have to be the varieties we have on hand. You will get immediate shipment on them. You can tell us what you would like to have and if we have them we will fill orders just as ordered, but if we do not have them you will receive the plants we select. These plants range in price from \$1.50 to \$5.00 and they will be included in the assortments if we have the ones you ask for. If you want to specify the variety you want, send price of plant that is marked on this list and we will ship as they come in.

1. ~~Brassavolae Digbyana~~. Pseudobulbs erect, clavate, 1-lvd; fleshy Infl. slightly exceeding the leaf, 1 fld. flowers 4 to 6 in. acr. We do not stock this plant, we order in spring and fall. Send your order in advance. Used for Hybridizing. \$5.00
